[PROGRAMME]

I. **Brief description of the project tasks of ALL (including unfunded) project members** – Austria and partner country

| name | country | academic status | | tasks | dates |
|---|---|---|---|---|---|
| **Günther Raidl** | Austria | ☐ | PhD student | PI on Austrian side, coordination with both teams, general scientific guidance, algorithm development, theoretical aspects, coordination and refinement of research papers, Focus on LNS, diffusion models, primarily responsible for DynEADARP | 2007-2008 |
| | | ☒ | researcher | | |
| **Maria Bresich** | Austria | ☒ | PhD student | Focus on LNS, GFlowNet approaches, DynEADARP | 2007-2008 |
| | | ☐ | researcher | | |
| **Laurenz Tomandl** | Austria | ☒ | PhD student | Focus on LNS-CMSA integration, Column Generation, DynEADARP | 2007 |
| | | ☐ | researcher | | |
| **Martin Wustinger** | Austria | ☒ | PhD student | Focus on diffusion approaches and their integration in LNS/CMSA, DynEADARP | 2007-2008 |
| | | ☐ | researcher | | |
| **Marko Djukanovic** | Bosnia | ☐ | PhD student | PI on Bosnian side, coordination with both teams, collaboration environment, general scientific guidance, algorithm development, theoretical aspects, coordination and refinement of research papers; focus on CMSA, online learning, alternative learning approaches, primarily responsible for MCS | 2007-2008 |
| | | ☒ | researcher | | |
| **Tatjana Zec** | Bosnia | ☒ | PhD student | Focus on mathematical/theoretical aspects, in particular for MCS | 2007 |
| **Milan Predojevic** | Bosnia | ☒ | PhD student | Implementation of framework, CMSA, online learning, in particular for MCS | 2007-2008 |

| | | | | | |
|---|---|---|---|---|---|
| **Bojan Nikolic** | Bosnia | ☐<br>☒ | PhD student<br>researcher | Focus on mathematical/theoretical aspects, CMSA, online learning, in particular for MCS | **2007-2008** |

**II. Please answer the following questions:**

1. What scientific, artistic and personal skills and competencies are requirement from the participants to successfully complete this project? (keywords only!)

- Expertise in machine learning, in particular online learning
- Expertise in metaheuristics, in particular mathematical programming
- Expertise in graph theory, optimization problems on graphs

2. Involvement of stakeholders in project implementation. Planned reflection and feedback activities during and after project implementation. (keywords only!)

- Bi-weekly online meetings, publication of joint research papers
- Mutual research visits with joint workshops, progress reviews and feedback rounds at project milestones
- Presentation at international conferences, feedback from the scientific community and practitioners (e.g., mobility providers); final joint review and planning of follow-up cooperation
